### **DETAILED ACTION**

This Office action is in response to applicant's amendment filed on 1/11/2008.

#### ***Status of Claims***

Claims 1, 2, 7-10, 13-14 and 19-21 are pending.

Claims 3-6, 11-12, 15-18 and 22-34 are withdrawn.

#### ***Election/Restrictions***

Applicant's election with traverse of Species I in the reply filed on 1/11/2008 is acknowledged. The traversal is on the ground(s) that the embodiments shown in Figs. 1, 3-4 are patentably distinct such as identifying separate classes in each embodiment would be found for searching. This is not found persuasive because the species are distinct in Figs. 1, and 3-4 that would required further consideration and search because of its distinction feature.

The requirement is still deemed proper and is therefore made FINAL.

#### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 3635

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 7-10, 13-14, and 19-21 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 7,322,155. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the features in the instant claims are included within the patented claims. For example, the instant independent claim 1 is corresponding to the patented claims 1 and 6 for an improved stud within a wall and the stud having a side wall with comprised of a plurality of grooves extending from the top toward the bottom of the cylindrical body and the wall obviously having wall material bonding within the grooves of the stud and other of the patented claims are corresponding to the instant claims for the coating material features.

### ***Conclusion***
